

Brain And History By Luciano Mecacci

Brain And History By Luciano

Dennis Brain (17 May 1921 – 1 September 1957) was a British virtuoso horn player who was largely credited for popularizing the horn as a solo classical instrument with the post-war British public. With the collaboration of Herbert von Karajan and the Philharmonia Orchestra, he produced what many still consider to be the definitive recordings of Mozart's horn concerti.

Dennis Brain - Wikipedia

Charles "Lucky" Luciano (/ ˌ l uː tʃ i ˈ ɑː n oʊ /, Italian: [luˈtʃaːno]; born Salvatore Lucania Italian: [salvaˈtoːre luˈkaːnja]; November 24, 1897 – January 26, 1962) was an influential Italian-born mobster, criminal mastermind, and crime lord who operated mainly in the United States. Luciano is considered the father of modern organized crime in the United States for the ...

Lucky Luciano - Wikipedia

By 1920, Luciano had branched out into bootlegging and illegal gambling. With financing and an education in social skills from his mentor "Arnold the Brain" Rothstein, Luciano and his partners were grossing over \$12 million a year from the sale of illicit alcohol by 1925.

The neurologist Benjamin Libet performed a sequence of remarkable experiments in the early 1980's that were enthusiastically, if mistakenly, adopted by determinists and compatibilists to show that human free will does not exist. His measurements of the time before a subject is aware of self-initiated actions have had a enormous, mostly negative, impact on the case for human free will, despite ...

Figure 1: Deep sequencing reveals brain somatic mutations in MTOR from FCDII subjects. Figure 3: The identified mutation induces spontaneous seizures and cytomegalic neurons rescued by rapamycin ...

Brain somatic mutations in MTOR cause focal cortical ...

Astrocytes are important regulators of brain functions, and crucial functions are executed via astrocyte-secreted proteins. • Astrocyte-secreted proteins play key roles in physiological processes and execute both detrimental and beneficial actions in CNS disorders.

Functional dissection of astrocyte-secreted proteins ...

The genetic architecture of brain structure and function is largely unknown. To investigate this, we carried out genome-wide association studies of 3,144 functional and structural brain imaging ...

Genome-wide association studies of brain imaging ...

From its earliest beginnings, the problem of "free will" has been intimately connected with the question of moral responsibility. Most of the ancient thinkers on the problem were trying to show that we humans have control over our decisions, that our actions "depend on us", and that they are not pre-determined by fate, by arbitrary gods, by logical necessity, or by a natural causal determinism.

Explaining animal behavior requires more than defining stimulus-response relationships. Rather, cognitive processes like spatial attention, reward expectation, sensory prediction, and the construction of internal spatial maps have a fundamental role in modifying these relationships. Conceptual frameworks for thinking about such internal processes, and our understanding of their neural ...

Meet our new HHMI investigators. They join a community of 300 scientists who are making dramatic advances in how we understand biology. Among their work to date, they have revealed history from ancient DNA, improved life for children with metabolic diseases, and uncovered genetic secrets that could help fight the flu. Here's what drives these #HHMIInvestigators.
