But as conditions changed, and hominins moved from the forests and trees to the drier open savannahs, they became increasingly carnivorous. Until quite recently, we still shared the planet with ...

### **BBC - Earth - Why are we the only human species still alive?**

The human condition is "the characteristics, key events, and situations which compose the essentials of human existence, such as birth, growth, emotionality, aspiration, conflict, and mortality". This is a very broad topic which has been and continues to be pondered and analyzed from many perspectives, including those of religion, philosophy, history, art, literature, anthropology, psychology ...

### **Human condition - Wikipedia**

Human nature is a central question in Chinese philosophy. From the Song dynasty, the theory of potential or innate goodness of human beings became dominant in Confucianism.. Mencius understood human nature as an ideal state that's expected to be formed under the right conditions or perhaps the innate tendency to this state. He argues that human nature is good.
