Film & TV Services | Lighting and Generation Facilities ...

Soft front light / hot backlight. A popular technique in film lighting is to use a soft (diffuse) light source from the front and a stronger, more directional light from the back, so that your subject has a hot edge. The soft frontal light is known as the fill light; the strong light at the back is known, unsurprisingly, as the backlight.. You can arrange the lights in such a way as to leave ...

Rembrandt lighting is a lighting technique that is used in studio portrait photography. It can be achieved using one light and a reflector, or two lights, and is popular because it is capable of producing images which appear both natural and compelling with a minimum of equipment. Rembrandt lighting is characterized by an illuminated triangle under the eye of the subject on the less illuminated ...

Rembrandt lighting - Wikipedia

To achieve the results mentioned above, a Lighting Director may use a number or combination of Video Lights. These may include the Redhead or Open-face unit, The Fresnel Light, which gives you a little more control over the spill, or The Dedolight, which provides a more efficient light output and a beam which is easier to control.
