Multiscale Deformation And Fracture In

Overview of constitutive laws, kinematics, homogenization and multiscale methods in crystal plasticity finite-element modeling: Theory, experiments, applications

Overview of constitutive laws, kinematics, homogenization ...

Course Descriptions. Courses offered in our department for Applied Mechanics, Civil Engineering and Mechanical Engineering are listed below. Be aware that some courses are not offered every year; see the course schedule page to check if the class is offered this year.. Applied Mechanics Courses

Caltech Mechanical and Civil Engineering | Course Descriptions

Schematic diagram of the fabrication process for the nanowire-microfluidic hybrid (NMH) strain sensor. a Attach PI tape to a glass substrate. b Deposit nanowires or nanotubes onto the PI tape to

...

Multiscale nanowire-microfluidic hybrid strain sensors ...

A multiscale framework is developed for exploring tensile and compressive behaviors of single and multi-walled carbon nanotubes (CNTs). The multiscale approach is derived based on a molecular dynamic finite element method (MDFEM), in which new types of 2, 3 and 4-node MDFEM user elements are generated on the basis of force fields methodology.

Multiscale MDFEM for modeling mechanical behavior of ...

Experiences. Visiting Professor, Nanyang Technological University, Mar. 2018 - present Adjunct Professor, CAMP-Nano, Xi'an Jiaotong University, Oct. 2011 - present Principal Research Scientist, Dept of Materials Sci & Eng, MIT, Feb. 2011 - present Principal Investigator & Director, Nanomechanics Lab, MIT, Oct. 2010 - present ...

Ultrafine grained steels with grain sizes below about 1 μm offer the prospect of high strength and high toughness with traditional steel compositions. These materials are currently the subject of extensive research efforts worldwide. Ultrafine grained steels can be produced either by advanced thermomechanical processes or by severe plastic deformation strategies.

ultra fine grained steel, UFG steel, carbon, strength, UTS ...

Making transformational and technological advancements. The School for Engineering of Matter, Transport and Energy continues to make transformational, technological advancements to elevate Arizona State University's academic enterprise.

Faculty - School for Engineering of Matter, Transport and ...

TWIP steels, which stands for twinning-induced plasticity steels, have received very high interest in recent years due to their excellent mechanical properties at room temperature combining high strength (ultimate tensile strength of up to 1 GPa) and ductility (elongation to fracture up to 100 %) based on a high work-hardening capacity.

TWIP, TRIP, AHSS, stainless steel, high Mn steel, manganese ...

Author notes. Kahp-Yang Suh. Deceased. Affiliations. Global Frontier Center for Multiscale Energy Systems, Department of Mechanical and Aerospace Engineering, Seoul National University, Seoul 151 ...

Ultrasensitive mechanical crack-based sensor inspired by ...

OBJECTIVES AND TOPICS. The 4th International Symposium on Phase-Field Modelling in Materials Science (PF 19), to be held at the Ruhr-Universität Bochum / Germany, is intended to provide an excellent forum for the growing phase-field community.

pf19 - The 4th International Symposium on Phase-Field ...
