Dresser Natural Gas Solutions. Dresser Natural Gas Solutions (NGS) is a leading provider of measurement, instrumentation, and piping solutions to the natural gas distribution and transmission markets throughout the world.

Home | Dresser NGS

Liquefied natural gas (LNG) is natural gas (predominantly methane, CH₄, with some mixture of ethane C₂H₆) that has been cooled down to liquid form for ease and safety of non-pressurized storage or transport. It takes up about 1/600th the volume of natural gas in the gaseous state (at standard conditions for temperature and pressure). It is odorless, colorless, non-toxic and non-corrosive.

Liquefied natural gas - Wikipedia

REASONS FOR MEASURING THE MOISTURE CONTENT IN NATURAL GAS. 1. Natural Gas must often be dried before it can be distributed to its end users. The drying is necessary to prevent hydrate formation and liquid water deposition in the pipelines and/or condensation in the compressors; all of which would either cause damage or poor performance of the equipment.

Natural Gas - Phymetrix

Natural gas consolidates at the lows. The market is oversold. A low withdrawal and little reaction. Another cold blast could take the price to \$3. I still like BOIL in the current environment with ...

SNG Energy. Natural gas is one of the most plentiful fuels used today for combustion processes. Natural gas is a clean, low cost fuel, and can be used with a variety of different equipment.

Aether DBS - Fuel Gas Systems & Engineered Process Systems

Natural Gas & LNG. The presence of moisture in high-pressure natural gas from production wells causes pipelines and associated valves to freeze. High moisture content also leads to the formation of hydrates of the liquid hydrocarbons present, thus causing further difficulties. The moisture content of the gas also adversely affects the calorific value of the gas, thus lowering the quality and
