Hydrogeology (hydro-meaning water, and -geology meaning the study of the Earth) is the area of geology that deals with the distribution and movement of groundwater in the soil and rocks of the Earth's crust (commonly in aquifers). The terms groundwater hydrology, geohydrology, and hydrogeology are often used interchangeably.. Groundwater engineering, another name for hydrogeology, is a branch ...

Hydrogeology - Wikipedia

Evolution of Carbonate Sequences Summary Variations in carbonate depositional settings through time produce corresponding changes in their lateral and vertical facies geometry. High frequency changes in facies are induced by sea level, and climate, whereas long-term low frequency changes are commonly related to paleo-geography and plate configurations or the evolutionary changes in the ...

Caves, caverns, channels, and voids; the hidden world ...

Orientation Identification. Though there is archaeological evidence that societies have been living in Nigeria for more than twenty-five hundred years, the borders of modern Nigeria were not created until the British consolidated their colonial power over the area in 1914.

Culture of Nigeria - history, people, clothing, traditions ...

Peak oil is the point in time when the maximum rate of global petroleum production is reached, after which the rate of production enters its terminal decline. If global consumption is not mitigated before the peak, an energy crisis may develop because the availability of conventional oil will drop and prices will rise, perhaps dramatically.
