There are some color combinations that are simply not seen very often, and for some reason the mix of green into a gray interior falls in this category. In fact, it took quite a bit of searching through photos on Houzz to find enough examples for this Ideabook. So much so that in a few of the rooms featured here the presence of green in the gray color scheme is in the form of plants!

The color wheel is a chart representing the relationships between colors. Based on a circle showing the colors of the spectrum originally fashioned by Sir Isaac Newton in 1666, the colour wheel he created serves many purposes today. Painters use it to identify colors to mix and designers use it to choose colors that go well together.
