Unicompartamental knee arthroplasty (UKA) is a surgical procedure used to relieve arthritis in one of the knee compartments in which the damaged parts of the knee are replaced. UKA surgery may reduce post-operative pain and have a shorter recovery period than a total knee replacement procedure, particularly in people over 75 years of age. Moreover, UKAs may require a smaller incision, less ...

This is a really good stretch to make sure you hit your Rec Fem (which crosses your hip and knee joint), which is one of the hip flexor muscles that doesn't usually get hit with standard hip flexor stretches. My hot tip for this exercise is to put a pillow underneath your knee, otherwise it gets really painful!
