

## *When An Echo Returns An Echo Branson Investigation 2*

### **When An Echo Returns An**

echo is a built-in command in the bash and C shells that writes its arguments to standard output.. A shell is a program that provides the command line (i.e., the all-text display user interface) on Linux and other Unix-like operating systems.It also executes (i.e., runs) commands that are typed into it and displays the results. bash is the default shell on Linux.

Acoustic phenomenon. Acoustic waves are reflected by walls or other hard surfaces, such as mountains and privacy fences. The reason of reflection may be explained as a discontinuity in the propagation medium.This can be heard when the reflection returns with sufficient magnitude and delay to be perceived distinctly. When sound, or the echo itself, is reflected multiple times from multiple ...

Echo suppression and echo cancellation are methods used in telephony to improve voice quality by preventing echo from being created or removing it after it is already present. In addition to improving subjective audio quality, echo suppression increases the capacity achieved through silence suppression by preventing echo from traveling across a network.
